

## Conveyor Vessels

Conveying vessels can be used for blasting materials or various other media.

The pots are manufactured in series or customised to your requirements. We keep the components for our series vessels in stock so that you can customise them with optional accessories.

### We manufacture

Conveyor Vessels FB	
<b>Pressure</b>	6 - 12 bar
<b>Volume</b>	10 - 6.000L
<b>Diameter</b>	258 - 3.000mm
<b>Materials</b>	carbon & stainless steels
<b>Connections</b>	individual connections
<b>Installation</b>	upright, hanging, in frame, forklift pockets

### Our Standard Vessels

Volume	Pressure	Diameter
100 L	6 - 12 bar	508mm
150 L	6 - 12 bar	508mm
200 L	6 - 12 bar	610mm
300 L	6 - 12 bar	610mm

- outward curvature of the torispherical head
- available with 90° conical head or steeper 60° conical part, so that more viscous contents can drain away optimally

### Optional

#### Funnels, sieves & lids

Filters out coarse particles during filling and protects the blasting material from moisture and dust

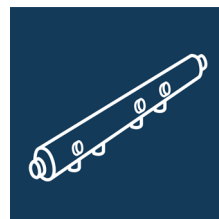

#### Installation of extras

On request, we can integrate fittings and other accessories that were designed by you

#### Coatings inhouse

We coat your vessels according to our standards or the desired RAL color

#### Compressed air distributor

Distributes the pressure and thus the blasting material in vessels with several outlets

#### Use halls & personnel

You can use our resources for your own assembly work on your vessel

#### Extensively certifiable

We can certify your vessels according to various international standards. Scan now to find out more!
